-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claims 6-33 and 39-40 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims not been further treated on the merits. Further note that claim 36 and dependents thereof depend from claim 33 which is an apparatus claim.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 36 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention; see above.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 and 34-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Rode et al. (US 5,184,996).

Rode discloses a process and apparatus comprising assembling a collapsible closure to a container using means to move the enclosure assembly (conveyor 49);

means 73 to move the walls of the collapsed enclosure assembly apart (by pulling on one wall via suction cups mounted on means 73) to expand the assembly into a general tubular form; and means to mount the expanded assembly on a container; see figures 1, 5, 11, and 15-24; col. 3, lines 9+. The assembly is retained as claimed by suction cups 60 and moved into position at stage 37 then commencing the opening procedure; see col. 2, lines 49+.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rode et al. (US 5,184,996) in view of Wingerter (US 5,393,291).

The conveyor 49 of Rode et al. delivers collapsed assemblies 50 to unfolding station 37. There is no discussion of where the collapsed assemblies 50 arrive from.

Wingerter teaches an inclined hopper/chute for storing blanks before feeding to an erector comprising parallel side walls 56 for holding the blanks in a substantially upright position held in position by opposing pusher plate and end wall 140; see figures 4-5. It would have been obvious to one of ordinary skill in the art at the time of the invention to include the chute of Wingerter in the invention to Rode et al. for efficient storing and loading of the device.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
